My name is Kay Lameyer, and my husband Jim and I are the owners of Blue Thunder Trucking. You might not remember us, but we have never forgotten you.

A little over two years ago, we were working with our Kenworth T800 Tandem Dump Truck in our hometown of Colorado Springs, CO. We were considering closing our business because Jim was in so much pain. His head, back and knee hurt daily. We tried everything from therapy, exercise, and medication. We even moved to the Arizona/Nevada area hoping the warm climate would help him.

The real answer came for us after we attended the 2006 Truck Show in Las Vegas, NV. Knoedler Manufacturers had their seats on display. They told us about the quality and craftsmanship of a Knoedler seat, and we purchased The Chief seat after the show.

This was the best investment we ever made. The seat was installed in half an hour, and Jim noticed the difference immediately. He has felt incredible relief since the first day. Blue Thunder is a strong company again, and Jim tells

Power-Chief Air-Suspension Seat

FRONT

WARNING: It is the responsibility of the installer to determine the suitability for use of this product in each application. The drawings are for reference purpose only

WARNING: Serious injury may occur if head clearance is not adequate. After installing seat and before riding or driving the vehicle, ensure there is adequate head clearance at maximum upward travel of seat.

In order to reach the highest position of the seat, while sitting in seat, slowly raise the seat to its maximum height by actuating the suspension air control valve.
